

EQUIPMENT, LOGISTICS & SITE SERVICES

COMPANY PROFILE

Rental Equipment • Logistics • Cabins • Environmental • Utility Supply

Keep projects equipped and moving.

RIYADH, SAUDI ARABIA

Project support built around access, capacity and schedule.

ADCORP coordinates rental equipment, transport, temporary site facilities, environmental services and diesel or water supply. Equipment type, capacity, access, mobilisation and service timing are reviewed for every enquiry.

CORE CAPABILITIES

- Rental Equipment
- Transport & Logistics
- Portable Cabins & Site Facilities
- Environmental Services
- Diesel & Water Supply

VISION

To be a responsive project-support partner for equipment, logistics and site-service requirements across Saudi Arabia.

MISSION

To coordinate the right resource, capacity and service arrangement with clear mobilisation, operating and commercial expectations.

WORKING VALUES

Responsiveness

Clear communication and timely follow-up.

Quality

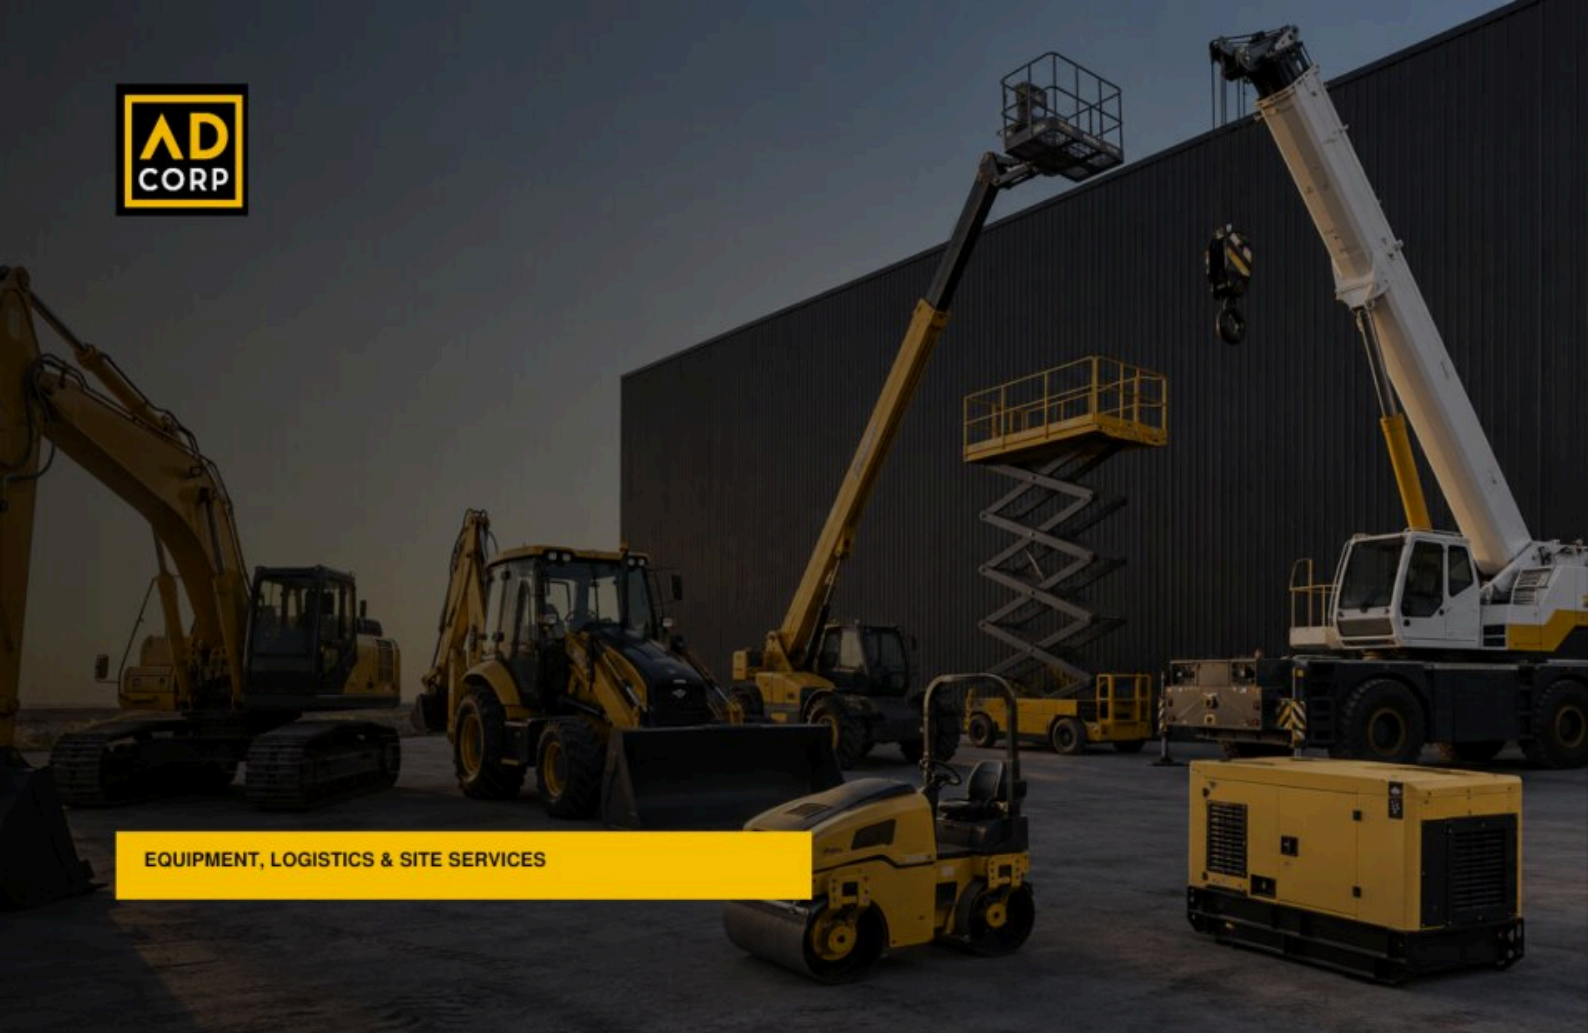

Attention to suitable materials and finish.

Value

Practical solutions considered against need and target.

Accountability

Ownership from enquiry through completion.

A large photograph of a construction equipment yard at dusk. Various pieces of yellow and white machinery are parked in front of a large, dark industrial building. The equipment includes an excavator, a backhoe loader, a boom lift, a scissor lift, a roller, and a generator.

EQUIPMENT, LOGISTICS & SITE SERVICES

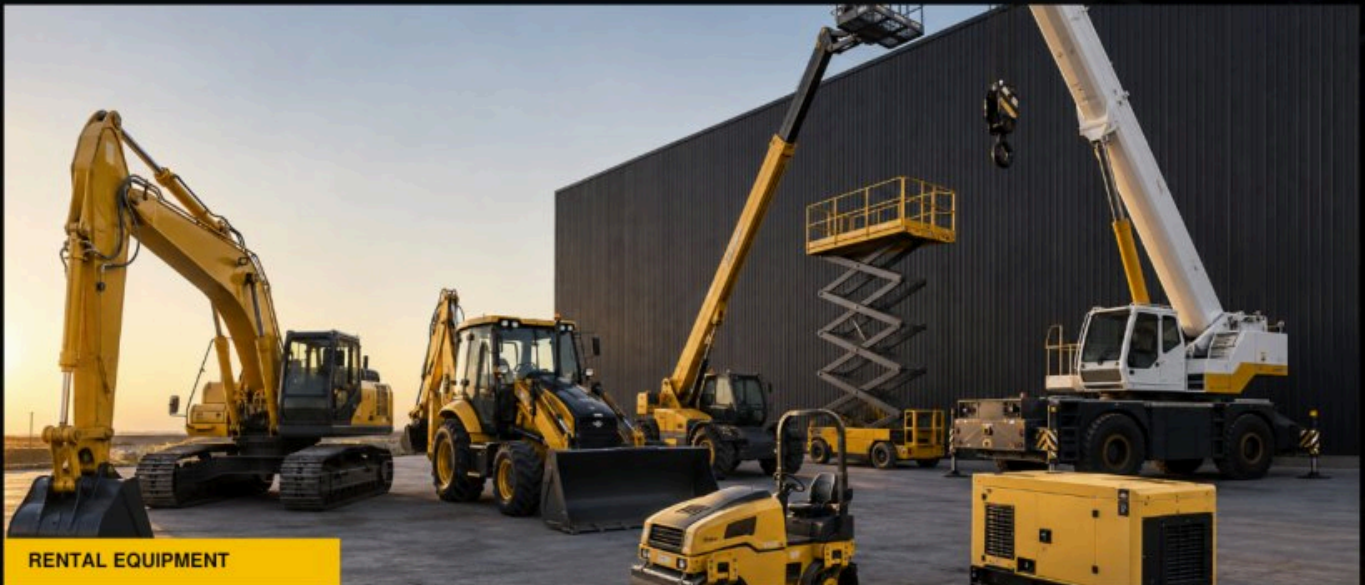

Keep projects equipped, supplied and moving.

This ADCORP profile brings together rental equipment, transport and logistics, portable site facilities, environmental services and diesel or water supply.

CORE SERVICES

- Rental Equipment
- Transport & Logistics
- Portable Cabins & Site Facilities
- Environmental Services
- Diesel & Water Supply

Rental Equipment

RENTAL EQUIPMENT

Rental Equipment is the first contracting service offered by ADCORP, with equipment type, capacity, rental term and site conditions confirmed for each enquiry.

SCOPE AND SUPPORT

- Access and lifting equipment including manlifts, scissor lifts, cranes, boom trucks, forklifts and power towers.
- Earthmoving and compaction categories including excavators, backhoe loaders, bulldozers, wheel loaders, skid steers and rollers.
- Generators, tower lights and welding equipment for power, illumination and selected site-support requirements.
- Flexible rental periods and operator arrangements considered according to equipment category, site conditions and availability.
- Pre-rental inspection, maintenance status, delivery, collection, responsibilities and commercial terms confirmed before mobilisation.

Final scope, material selection, quantities and schedule are confirmed for each enquiry.

EQUIPMENT & SITE SERVICES PROFILE

Equipment Fleet

LIFTING, EARTHMOVING AND POWER EQUIPMENT

Manlift (10-47 m)

Scissor Lift (8-18 m)

Tower Light

Chain Excavator

Backhoe Loader

Bulldozer

Forklift

Diesel Generator

Roller Compactor

Wheel Loader

Skid Steer

Power Tower

Transport & Support Fleet

PROJECT LOGISTICS AND MOBILITY

Project vehicles and transport support can be coordinated according to capacity, access, route and availability.

Low-Bed Trailer

Boom Truck (5-25 t)

Flat-Bed Trailer

Executive 4x4

Pickups 4x2 & 4x4

Crew Transport Van

Dump Truck (16 & 24 m3)

66-Seater Bus

Ambulance

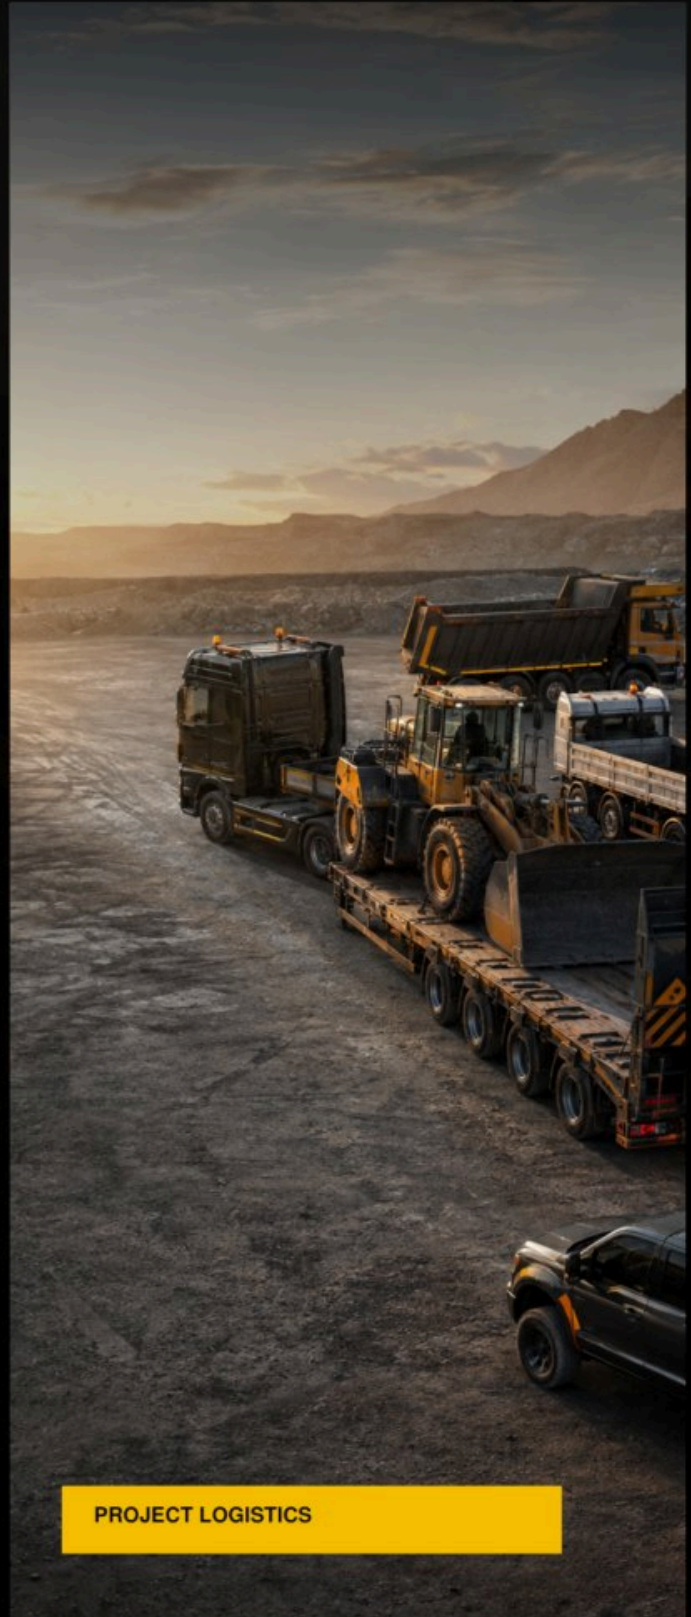

Transport & Logistics

ADCORP can coordinate vehicles, trailers and transport support for project movement, site logistics and operational requirements.

SCOPE AND SUPPORT

- Low-bed and flat-bed trailers for moving equipment, machinery and project materials.
- Dump trucks, pickups and 4x4 vehicles for site, material and operational movement.
- Crew transport vans, buses and ambulances arranged for workforce mobility or project-support requirements.
- Boom trucks and lifting or handling support subject to capacity, access and availability.
- Loading points, routes, access restrictions, dispatch timing and delivery locations coordinated in advance.

Vehicle type, capacity, route, loading responsibility and schedule are confirmed for each movement.

PROJECT LOGISTICS

Portable Cabins & Site Facilities

PORTABLE SITE FACILITIES

Portable cabins can be configured to support temporary project offices, welfare, security, meeting and storage requirements.

SCOPE AND SUPPORT

- Site offices, meeting cabins, security cabins, storage units and welfare facilities configured to requirement.
- Cabin size, layout, occupancy, duration and intended site location reviewed before quotation.
- Lighting, air-conditioning, furniture, electrical or plumbing provisions included where agreed.
- Transport, lifting, placement, relocation and collection coordinated around site access.
- Ground readiness, utility connections, included services and responsibilities confirmed before delivery.

Cabin configuration, included facilities, rental term, delivery and placement are confirmed before mobilisation.

Environmental Services

ENVIRONMENTAL SUPPORT

ADCORP can coordinate practical wastewater and waste-handling services for construction, industrial and facility environments.

SCOPE AND SUPPORT

- Sewage and wastewater collection, removal and scheduled service arrangements.
- Vacuum-tanker coordination based on site access, estimated volume and service frequency.
- Skip bins and skip containers selected according to waste type, volume and available placement area.
- Collection, transportation, segregation and recycling support where included in the confirmed scope.
- Safety, environmental, timing and site-coordination requirements reviewed before service commencement.

Service frequency, access, waste category, collection method and disposal requirements are confirmed for each site.

Diesel & Water Supply

Scheduled or requirement-based diesel and water deliveries can support projects, facilities and operational sites.

SCOPE AND SUPPORT

- Diesel supply arranged for equipment, generators and approved site-operational requirements.
- Water supply coordinated for construction, facility and selected service needs.
- Delivery quantity, tanker access, timing and safe transfer arrangements reviewed in advance.
- One-time, scheduled or recurring supply plans considered according to expected consumption.
- Delivery records, site responsibilities, safety controls and commercial terms confirmed for each requirement.

Product type, quantity, delivery point, transfer method and schedule are confirmed before dispatch.

UTILITY SUPPLY

HOW WE DELIVER

A focused route from requirement to result.

The Equipment & Site Services profile combines relevant sector understanding, practical coordination and one accountable point of contact.

SECTOR FIT

CLEAR COORDINATION

RESPONSIVE SUPPORT

TYPICAL SECTORS

Where we support

- Construction, project and real-estate sites
- Industrial, warehousing, facility and maintenance operations
- Events, temporary sites and emergency project support

Scope is adapted to the site, operating environment and procurement requirement.

WORKING APPROACH

How the work moves

- Clarify scope, specifications, quantities, site conditions and timing.
- Confirm the proposed solution, assumptions, price and commercial terms.
- Coordinate sourcing, production, mobilisation, delivery or execution.
- Review completion, handover and any agreed follow-up support.

Key responsibilities and access requirements are made clear before work starts.

WHY ADCORP

Why clients engage us

- Focused equipment & site services capability through one responsive contact.
- Requirement-aware proposals with practical attention to target and timing.
- Flexible support for single items, recurring needs or defined project packages.
- Riyadh-based coordination with clear accountability through completion.

The objective is simple: reduce coordination effort while keeping the next action clear.

LET'S WORK TOGETHER

Tell us what you need. We'll work on the right solution.
