

TRADING

COMPANY PROFILE

Electrical • Power & Control • Industrial MRO • Solar • General Materials

Source what the work requires.

RIYADH, SAUDI ARABIA

Relevant materials, sourced around the requirement.

ADCORP coordinates materials and supplies for construction, facilities, industrial activity, electrical requirements, advertising production and workplace needs. Specifications, ratings, quantities, standards, availability, alternatives and delivery are reviewed before confirmation.

CORE CAPABILITIES

General & Construction Materials
Electrical & Cable Systems
Power Distribution & Control
Automation & Instrumentation
Industrial MRO & Tools
Advertising, Safety & Office Supplies

VISION

To become a responsive supply partner known for practical sourcing, clear communication and dependable coordination.

MISSION

To connect each requirement with suitable materials, confirmed specifications and delivery arrangements that support the client's work.

WORKING VALUES

Responsiveness

Clear communication and timely follow-up.

Quality

Attention to suitable materials and finish.

Value

Practical solutions considered against need and target.

Accountability

Ownership from enquiry through completion.

TRADING DIVISION

Source what the work requires.

ADCORP's Trading profile coordinates general, construction, electrical, power, automation, industrial MRO, solar, advertising, safety and workplace supply requirements.

CORE SERVICES

- General & Construction Materials
- Electrical & Cable Systems
- Power Distribution & Control
- Automation, Instrumentation & MRO
- Solar & Energy Solutions
- Advertising, Safety & Office Supplies

Construction Materials

PROJECT MATERIALS

ADCORP can coordinate construction, maintenance and finishing materials for defined project packages or ongoing site requirements.

SCOPE AND SUPPORT

Boards, paints, coatings, pipes, fittings and related building or finishing materials.
Steel products, hardware, fixings and fasteners specified for the intended task.
Electrical and plumbing consumables for installation, maintenance or replacement activities.

Repair, protection and finishing materials selected according to the requested application.
Quantity, specification, packing and delivery planning aligned with the agreed project requirement.

Final scope, material selection, quantities and schedule are confirmed for each enquiry.

General Material Supply

MATERIAL SOURCING

ADCORP can source and coordinate general materials for ongoing operations, maintenance activities and project-based requirements.

SCOPE AND SUPPORT

Requirement-based sourcing supported by a clear description, specification, quantity and requested date.

Product and specification matching, including practical alternatives where the requested item is unavailable.

Hardware, consumables, fasteners, accessories and general operational or project materials.

Packaging, consolidation and delivery coordination based on item type, quantity and destination.

Availability, lead time and commercial terms confirmed through the quotation for each enquiry.

Final scope, material selection, quantities and schedule are confirmed for each enquiry.

Electrical & Cable Systems

CABLES & CONTAINMENT

ADCORP coordinates electrical cable, containment, connection and protection products against confirmed project or maintenance specifications.

SCOPE AND SUPPORT

LV and MV cables, grounding cables, wires, data, instrumentation and selected special cables.

Metal, PVC and flexible conduits with matching fittings, boxes and accessories.

Cable trays, ladders, mesh, raceways, supports and underground ducts.

Connection products including glands, lugs, cleats, joints, terminations, ties and installation consumables.

Earthing and lightning-protection products including bars, tapes, rods, clamps, air terminals and inspection pits.

Cable type, rating, standard, brand, quantity and availability are confirmed for each enquiry.

Power Distribution & Control

POWER & CONTROL

ADCORP coordinates power-distribution, protection and control equipment for defined facility, industrial and project requirements.

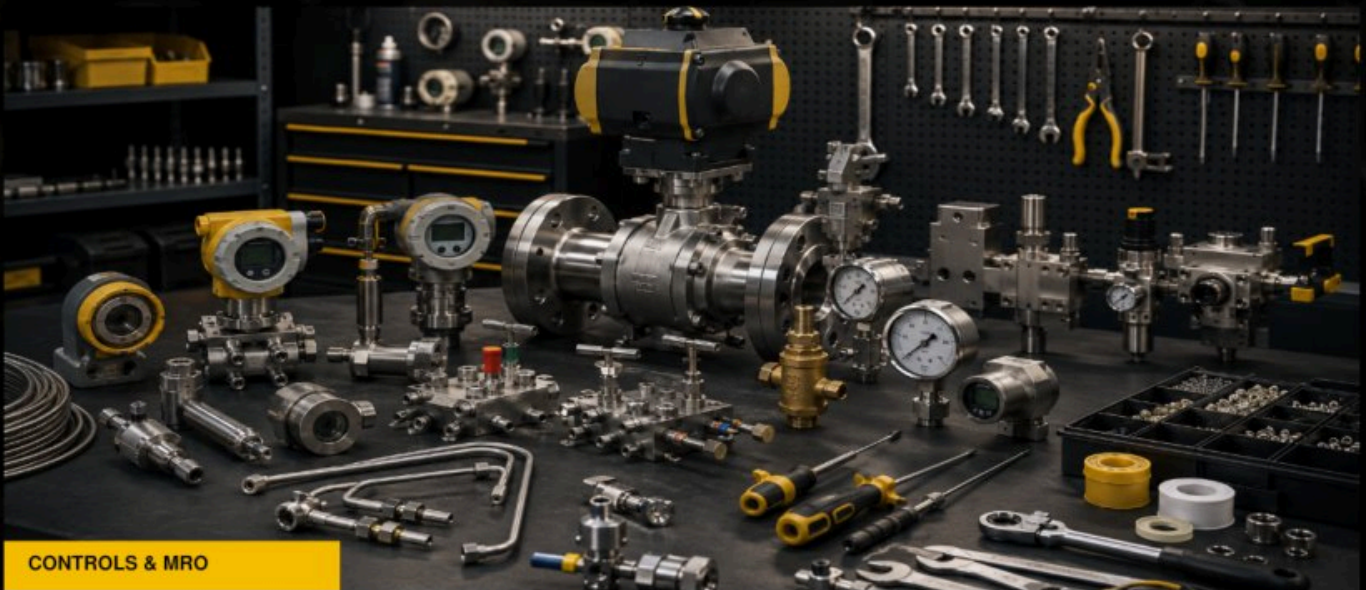

SCOPE AND SUPPORT

LV and MV switchgear, distribution boards, load centres, switch racks and ring-main units. Automatic transfer switches, UPS systems, variable-frequency drives and motor-control centres. Circuit breakers, safety switches, disconnectors, fuses, relays and contactors.

Oil-filled, dry-type, isolation, lighting and selected industrial transformers. Busway systems, packaged or unit substations, enclosures and related accessories. Wiring devices, lighting fixtures and explosion-protected equipment for specified environments.

System ratings, configuration, standards, accessories and delivery scope are confirmed for each enquiry.

Automation & Instrumentation

CONTROLS & MRO

ADCORP coordinates automation, instrumentation, test equipment, tools and MRO supplies for industrial, facility and maintenance requirements.

SCOPE AND SUPPORT

Valves, actuators, regulators, manifolds, tubing, strainers and selected process accessories.

Pressure and temperature sensors, gauges, switches, probes, thermocouples and instrumentation fittings.

Marking, identification and cable-labelling systems.

Digital meters, clamp meters, insulation testers, thermal instruments and selected diagnostic tools.

Hand tools, fasteners, adhesives, tapes, cleaning, HVAC, pump, motor and welding consumables.

Material, connection, range, standard and application are confirmed before quotation.

Item type, process conditions, range, standard, quantity and availability are confirmed for each enquiry.

Solar & Energy Solutions

SOLAR & STORAGE

ADCORP coordinates solar and energy components for commercial, facility and project applications, subject to technical review.

SCOPE AND SUPPORT

Photovoltaic panels and mounting accessories for on-grid or off-grid requirements.
String or central inverters, battery-storage systems and compatible balance-of-system components.
Smart meters, monitoring devices and data-communication accessories.

Protection, isolation and control panels with suitable cable routing and connection accessories.
Equipment selection reviewed against load profile, operating environment and required system configuration.
Installation or engineering support is defined separately when requested.

System concept, ratings, brands, warranties, availability and support scope are confirmed for each enquiry.

Advertising Materials

ADCORP supports advertising production requirements with relevant media, substrates, profiles, components and finishing consumables.

SCOPE AND SUPPORT

Vinyl, banner media, laminates and printable or coloured films for varied applications.
Acrylic, PVC and foam boards, sheet materials and selected display substrates.
Aluminium profiles, LEDs, modules and sign-making components or accessories.

Printing, application and finishing consumables required for workshop or site production.
Bulk, repeat or project-based supply coordinated around specifications and production deadlines.

Final scope, material selection, quantities and schedule are confirmed for each enquiry.

Safety & Industrial Supplies

SAFETY & INDUSTRIAL

Safety and industrial supplies can be sourced against stated site, workforce or operational requirements, with requested specifications confirmed at enquiry stage.

SCOPE AND SUPPORT

Personal protective equipment such as helmets, gloves, reflective vests and safety footwear.

Traffic cones, barriers, tapes, identification labels and standard site safety signs.

Industrial consumables, selected tools and practical accessories for site or workshop use.

Product type, requested standard, size and availability checked before commercial confirmation.

Delivery coordination for project sites, facilities, warehouses or recurring operational needs.

Final scope, material selection, quantities and schedule are confirmed for each enquiry.

Office & General Supplies

WORKPLACE SUPPLIES

Routine workplace requirements can be consolidated through one enquiry, reducing the effort of coordinating multiple everyday supply categories.

SCOPE AND SUPPORT

Stationery, paper, files, writing materials, printer toner and related office consumables. Cleaning and hygiene products for offices, facilities and shared operational areas. Pantry supplies, disposable items, packaging materials and selected small office equipment.

One-time, scheduled or repeat supply arrangements based on actual consumption requirements. Consolidated quotation and delivery planning for mixed product lists and multiple departments.

Final scope, material selection, quantities and schedule are confirmed for each enquiry.

HOW WE DELIVER

A focused route from requirement to result.

The Trading profile combines relevant sector understanding, practical coordination and one accountable point of contact.

SECTOR FIT

CLEAR COORDINATION

RESPONSIVE SUPPORT

TYPICAL SECTORS

Where we support

Construction, utilities and facility requirements
Industrial, energy and infrastructure supply
Advertising production, commercial, office and corporate operations

Scope is adapted to the site, operating environment and procurement requirement.

WORKING APPROACH

How the work moves

Clarify scope, specifications, quantities, site conditions and timing.
Confirm the proposed solution, assumptions, price and commercial terms.
Coordinate sourcing, production, mobilisation, delivery or execution.
Review completion, handover and any agreed follow-up support.

Key responsibilities and access requirements are made clear before work starts.

WHY ADCORP

Why clients engage us

Focused trading capability through one responsive contact.
Requirement-aware proposals with practical attention to target and timing.
Flexible support for single items, recurring needs or defined project packages.
Riyadh-based coordination with clear accountability through completion.

The objective is simple: reduce coordination effort while keeping the next action clear.
